BOOK 3

VIOLIN BEGINNER GUIDE

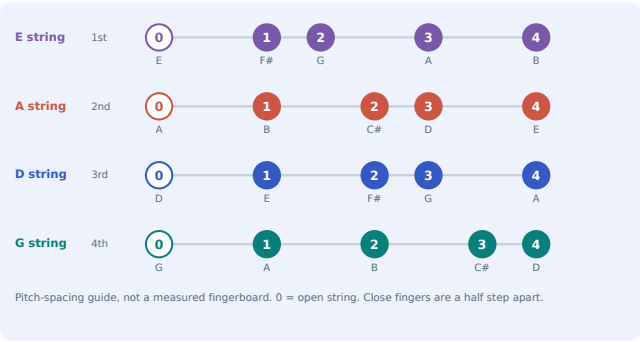

Scales, Etudes and Daily Practice

Expand into D, G and C major, then use etudes, daily practice and a log to build consistency.

01 Extend to D, G and C major

02 Build pitch and phrasing with etudes

03 Create a steady practice routine

Finger patterns across the strings

READ IN ORDER

For review: Book 2, page 6 has rhythm patterns; page 10 has Twinkle.

Inside this book

Scales, Etudes and Daily Practice

03 **D major scale and arpeggios**

Find F# and C# and extend to more strings.

04 **D major first-position etude**

Work line by line, then add slurs and bow changes.

05 **G major finger patterns and scale**

Listen for C natural with low 2 on the A string.

06 **G major first-position etude**

Practice slurs, rests and dynamic phrasing.

07 **C major scale and arpeggios**

Build confidence with low 1 and low 2.

08 **Daily practice and troubleshooting**

A short session for posture, rhythm, scales and music.

09 **Weekly plan and practice log**

Set one goal each day and record your progress.

10 **Sources and next learning steps**

Understand the source references and what comes next.

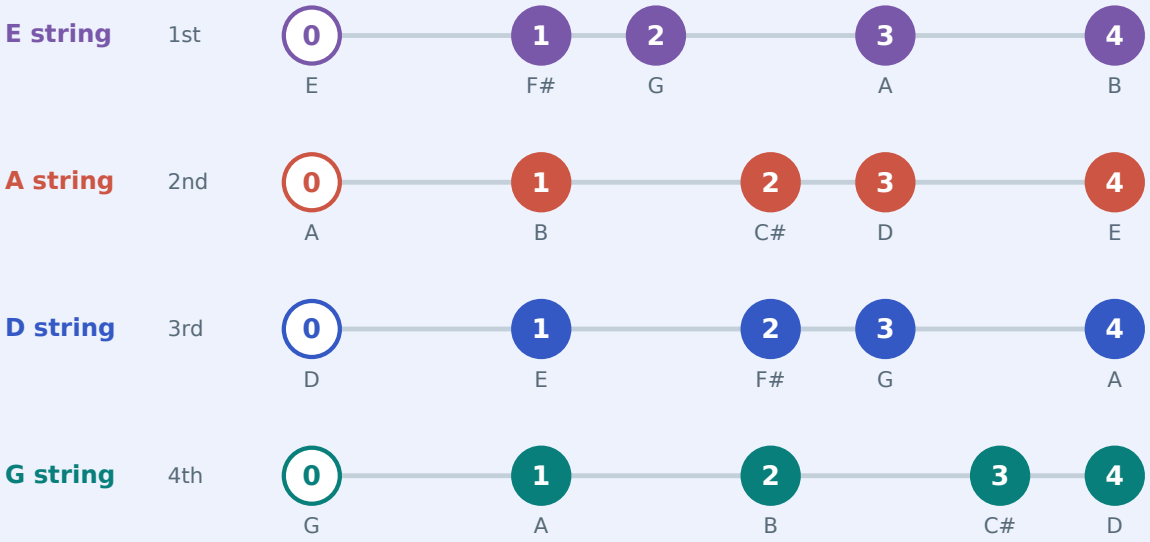

PRACTICE NOTES

Before starting: work through the posture and open strings in Book 1, then music reading, rhythm and A major in Book 2. Start slowly and work on one issue at a time.

Each book is numbered from its cover. Source notes retain the original textbook page numbers.

D major: expand your finger patterns

Two sharps: F# and C#. Begin with the one-octave scale on the D and A strings.

Pitch-spacing guide, not a measured fingerboard. 0 = open string. Close fingers are a half step apart.

Original music: one-octave scale and arpeggios

Check each line: the music includes 4/4 and 3/4. An arpeggio plays chord tones one after another.

Source: Original p. 22.

D major etude: pitch and flow

Komarovsky / Marked Allegro; begin more slowly if needed.

Work on one thing at a time

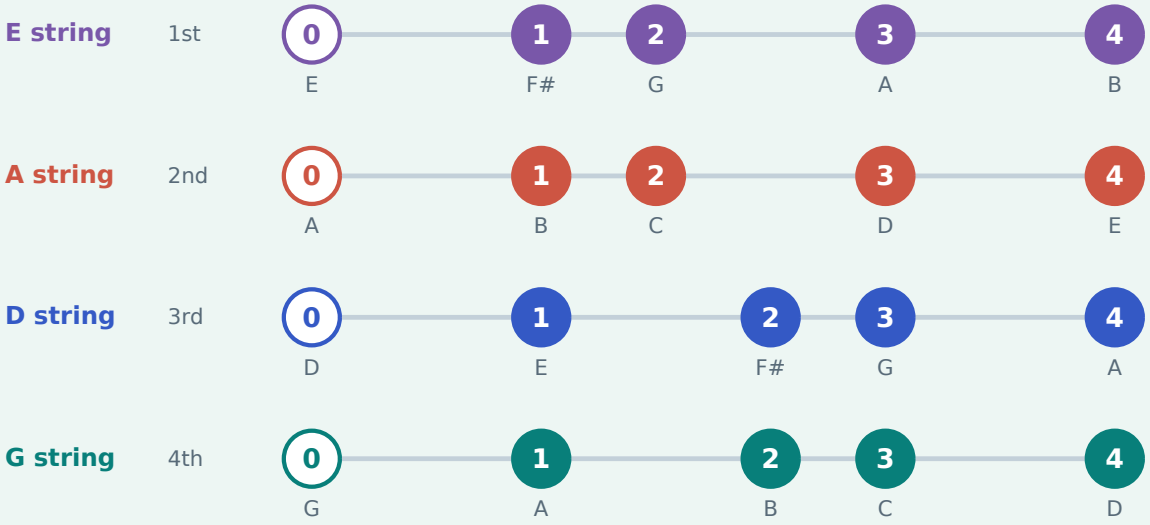

Practice pitch one line at a time, then add slurs and bow changes. Keep short notes from rushing and bow speed even within each slur. Repeat difficult spots before restoring the whole phrase.

- [ ] Secure F# and C# placement
- [ ] An even pulse through bow changes

Source: Original p. 23; added practice notes.

G major: begin on the lower strings

One sharp: F#. On the A string, C natural uses a low second finger.

Pitch-spacing guide, not a measured fingerboard. 0 = open string. Close fingers are a half step apart.

Original excerpt: two lines, then shorter notes

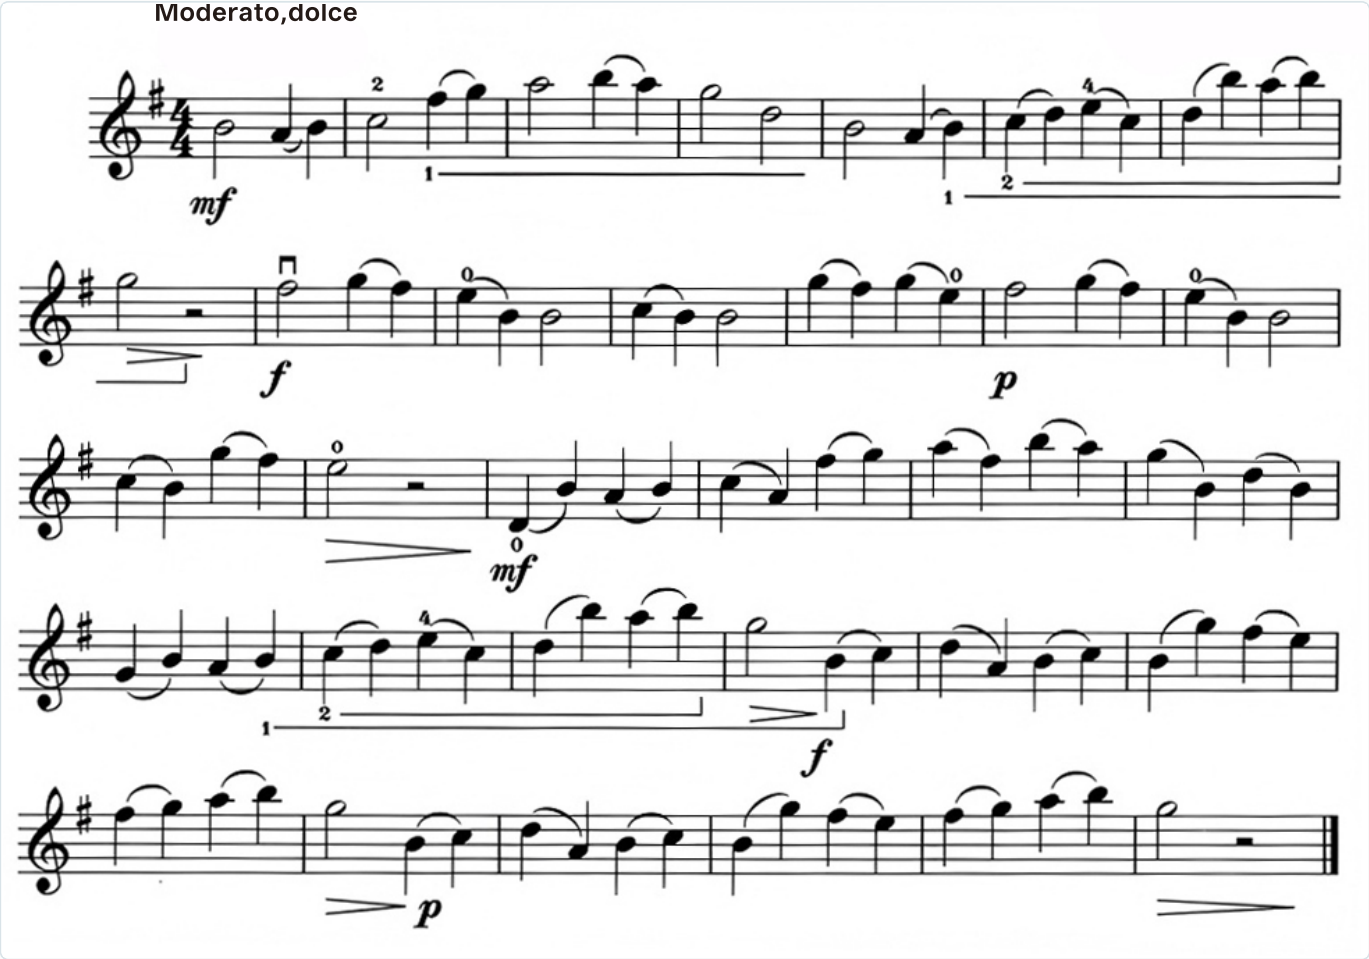

Listening task

C# in A major becomes C natural in G major. Find low 2, then return to the scale.

Source: Original pp. 24-25.

G major etude: shape the phrase

Komarovsky / Moderato, dolce: at a moderate pace, sweetly.

Three points to practice

1 Keep each slur in one bow

Plan the bow length so there is enough left for the next note.

2 Count through the rests

Allow the full written silence; avoid entering too soon.

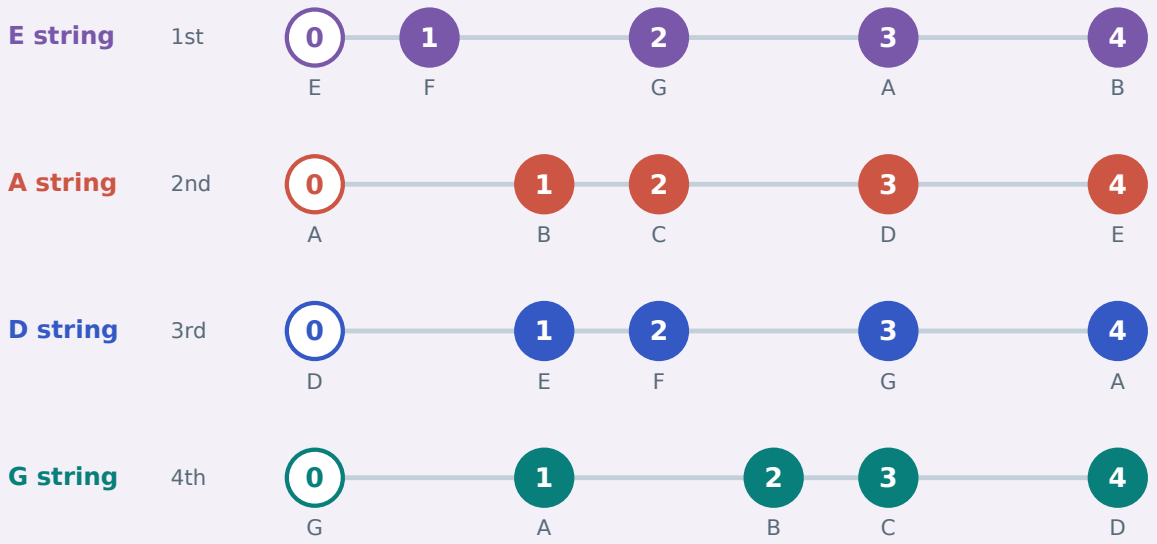

3 Notice dynamics and changes

Keep the rhythm first. Then add f, p and gradual changes with a natural sound.

Source: Original p. 26; added practice notes.

C major: low 1 and low 2

No key-signature sharps or flats. F on the E string uses low 1. Fingers 1-2 are close on A and D.

Pitch-spacing guide, not a measured fingerboard. 0 = open string. Close fingers are a half step apart.

Original music: scale and arpeggios

Keep this as an extension after A, D and G major. Find the natural notes slowly before working on a smoother flow.

Source: Original p. 27.

A focused 15-minute session

An added practice plan, built from the original book, that you can use each day.

Time	Task	Focus
2 min	Posture and bow hold	Release the shoulders. Check the thumb, little finger and wrist.
4 min	Open strings and rhythm	Start with long notes, then review the rhythms in Book 2, page 6.
4 min	Fingers and scales	Begin in A major; listen carefully to each slow note.
5 min	One short melody	Review Twinkle (Book 2, p. 10), or practice one etude line from this book.

What to check when something sounds wrong

What you hear or feel	Try this next
Uneven volume	Check bow speed, pressure and whether the contact point drifts.
Unwanted string contact	Use smaller strokes and reset the level of the intended string.
Notes out of tune	Slow down and check the half-step spacing before continuing.
Growing tension	Pause, relax, reset the hold and shorten the uninterrupted session.

Record one action to improve and one thing that went better. End with a clear, relaxed repetition.

Source: Based on original pp. 10-21; added schedule and troubleshooting.

One small goal each day

Repeat this suggested schedule as needed. Stay on a task until it feels secure; there is no need to rush.

Day	Practice content	Goal
Day 1	Posture and bow hold	Hold the violin and bow without unnecessary tension.
Day 2	Open A and E	Two beats per bow; alternate direction with an even pulse.
Day 3	Rhythm and string changes	Clap first, then play. Change cleanly between neighboring strings.
Day 4	A major finger pattern	Find the close relationship between fingers 2 and 3.
Day 5	Twinkle, phrase by phrase	Sing, then play. Give longer notes their full value.
Day 6	Scales and slurs	Repeat a familiar scale and share the bow across each slur.
Day 7	Review and reflect	Revisit the week's work and choose your next focus.

Note one change from today's practice

Date / minutes:

Most secure today:

Next focus:

- [ ] Steadier sound
- [ ] More relaxed hands
- [ ] More even rhythm

Source: Added practice planning page.

A steady foundation for the next step

This three-book set organizes the supplied beginner guide by topic and retains its posture photographs and music.

Source material and original page numbers

Content in this guide	Original printed pages
Parts and music reading	Original pp. 2-9
Posture, bow hold and basic bowing	Original pp. 10-15
Fingering, patterns and rhythm	Original pp. 16-19
A, D, G and C major; etudes	Original pp. 20-27

This set divides the supplied 24-page guide into three books. Source references retain the original textbook printed page numbers. Each book starts its own numbering at the cover.

What this edition includes

- Retained: posture, bow hold, left-hand shape, open strings, music reading, rhythm, first-position scales and beginner music.
- Added: English steps, string colors, finger-pattern diagrams, a daily plan and practice log.
- Next: the original also covers F and B-flat major, finger agility, further bow strokes, second and third positions, and double stops.

One steady note. Then a whole phrase.

AKLOT / VIOLIN BEGINNER GUIDE

Edition note: reorganized into three books; original photographs and music retained.
